# Southwest Florida Water Resources Conference

## A History of Evolving Issues & Priorities 1991 to 2010

#### Committee Members

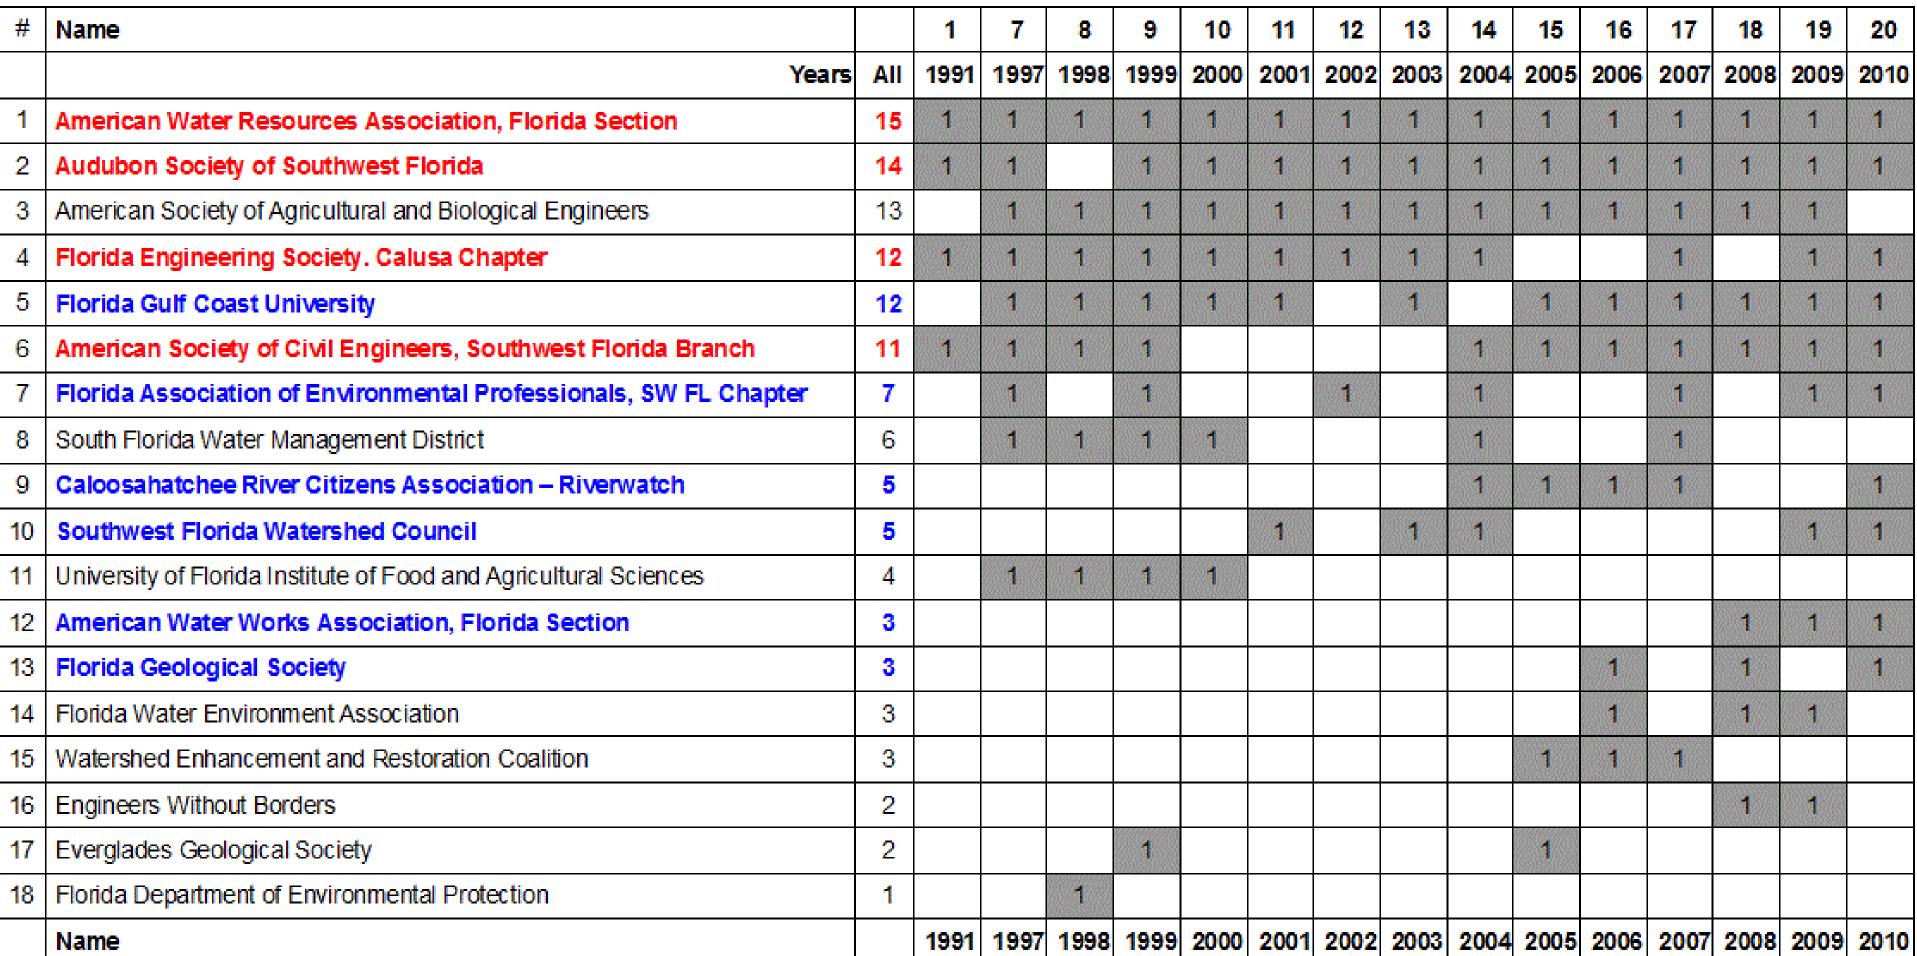

For each of the past 20 years a group of professional associations and educational institutions have joined together to host an annual meeting discussing regional water resources issues such as water supply, water quality, surface water, ground water, the Caloosahatchee Basin, Estero Bay, climate change, economics, hurricanes, floods, and drought. Conference proceeds support university student scholarships.
